EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. George Loud on January 17, 2008.

The application has been amended as follows:

In claim 1, line 9, please replace the phrase "a barrel" with -- a plating barrel --.

In claim 1, line 18, please replace the phrase "said barrel" with -- said plating barrel --.

In claim 5, line 5, please replace the phrase "said barrel" with -- said plating barrel --.

In claim 6, line 2, please replace the phrase "said barrel" with -- said plating barrel --.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The instant invention is distinguished over the prior art of record by a barrel plating device comprising a collar formed of a low friction material, said collar being fixed to a portion of each lead wire within and in sliding contact with a bush in a manner allowing rotation of the bush together with the barrel relative to said collar, said collar

Art Unit: 1795

having a slotted portion with a plurality of slots axially extending from an end thereof facing a hollow support shaft, said slotted portion extending into said large diameter bore and having an outer circumferential projection engaged within the groove. The prior art of record neither teaches nor suggests the combination of limitations recited in the instant claims.

Lewellen teaches collar bearings 24 and 34 (figures 1-5). However, the collar of Lewellen does not have a plurality of slots, a slotted portion extending into a large diameter bore, or an outer circumferential projection as recited in claim 1. Since the prior art of record neither teaches nor suggests the combination of limitations recited in the instant claims, one skilled in the art would not have been motivated to invent the claimed apparatus.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
